--------	--	--------	-----	-------

1985 Development of the 700 Eterna to replace the 900 series and introduced the professional 1200 series Eterna II & Renaissance models. Brett Getzen has said that the 700S has gold brass slides and lead pipe and a 0.460" ML bore. This was a better trumpet than the 700SP special which had a seamless bell. There is no difference between the 700S and 700S Eterna II which is close to the original design.
