Williamsport, PA

Silver plated brass mute from trumpet #6984 (auction photo)

Silver plated brass mute from cornet #9686, below and top right (author's photos)

Fiber mute from trumpet #25714 bottom right (auction photo)

## Cornet, Trumpet and Trombone Mutes

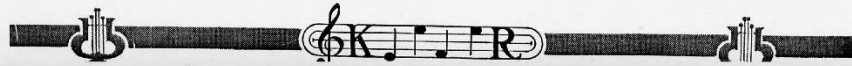

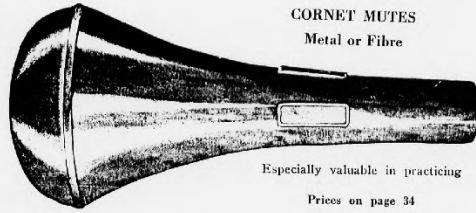

In Metal, Fibre and Hard Rubber

When Mutes, as in Mouthpieces, the market is just flooded with contraptions made by persons with no practical knowledge of the acoustic requirements or the players' needs.

Our Mutes will not cause an instrument to blow out of tune on any note.

We have had Fibre and Hard Rubber Mutes made especially to fit the bells of Keefer Cornets, Trumpets and Trombones. When put in the bell they stay put, and they give their effects without stifling the tone or making the instrument hard to blow.

In Hard Rubber we have a line of Mutes that will prove a delightful surprise to any player. In Fibre we have the best from every standpoint.

Another example from an auction – this appears to be plain brass
