

# Revere Band Instruments

## & Mouthpieces

The Revere band instruments and mouthpieces came from various sources and the examples found seem to indicate a variety of owners.

### Germany:

Two trumpets found at the Horn-u-copia.net site are marked, "US Zone Germany", which would indicate manufacture just after WWII (photos 1 & 2). These are said to match those made by Boehm-Meinl.

Some mouthpieces are marked "Germany" and likely come from the same time period (photo 3).

### England:

An alto horn (photo 4) is marked "Made in England" and came with a sales card from Sorkin Music in New York City, a retail outlet.

### Holland:

Trumpet #896636 (photo 5 & below) is marked "Made in Holland." This has a completely different logo so may be unrelated to the others.

### Pakistan:

Two mouthpieces with original boxes (below) have "Made in Pakistan" and "EMMC, Deer Park, NY" on them. These may have been sold through Eastern Marking Machine Corp. in Deer Park; a company founded in 1917.
